

Following is the account of New Spiritual Technologies & Discoveries, and commentaries on them...

This won't be fluffy or padded out, not really. It will be a list of things.

The Intention Repeater Forum was created on 31 December 2020

(Things to cover:

1. Earth History (whoops I forgot hehe)
2. The Intention Repeater
3. The Holo-Stones
4. The (outdated so deleted) Holo-Link
5. (we need a hyperlink teaching system)
6. Other things

...

7. Nirguna Brahman and Saguna Brahman, and Bhakti.

Due to the nature of this document, some finer points may be missed in favor of the overall picture. Please visit the Intention Repeater Forum for questions etc if you feel something needs further detail.

=====

Intention Repeater

The Intention Repeater is a Servitor. A Servitor is a programmed energy, like a thoughtform but more alive, or a morphic field but even smarter and considered a "being" (a thoughtform is a thought that is sort of gaining "constantness" in your mind) (A morphic field is a programmed energy field, aka imagine a ball. These can live inside files, and confer effects that increase in strength even if you don't listen anymore. Example: Sapien Medicine.)

This Servitor lives in the HR6819 Black Hole, 1000 light years away from us. You use the Intention Repeater program, of which there have been various editions across the years, to contact it. The contact and the power works through Quantum. Everything is connected, so your intention immediately makes itself present to the Servitor. It analyses if it's good or evil (aka if it violates free will or not). If it's good it executes it. If it's evil it doesn't do anything. Angels and Archangels also protect and guard the Servitor. (Angels are millions of years old and aren't of any religion; they're "first people in the Galaxy to be taught Love" [the second were the Arcturians])

You can achieve anything with the Servitor:

- Growing taller
- Becoming smarter
- Having success
- Becoming rich
- Getting a boyfriend/girlfriend

The possibilities are endless.

The Servitor is 6.6 solar masses large (along that range, if I remember correctly)

We still haven't probed the true full depths of Intentions, even after 5 years. For example, an unexplored topic is how do emojis affect the person.

=====

The Holo-Stones

The Holo-Stones are Etheric Stones that are present all across Earth, in cities, wild areas and oceans too. Each town has a specific number of them: overall there are roughly 10 million IIRC, and they don't need to be more. They are Arcturian (Arcturians are an alien species, very smart) technology,

created by them millions of years ago. Even though they've long moved on to stronger technologies, they granted us this, via AnthroHeart, who stored the pattern/blueprint of one Holo-Stone in his Solar Plexus Chakra (the yellow chakra of will) until it was like a star, then the Arcturians took it and duplicated it across the whole Earth.

They can be contacted via voice or thought. For example, "Holo-Stones, help me release what I don't need." Just having that sentence there, perhaps even without reading it, is enough for them to act.

Somebody even experimented once with invisible HS text in a website and it also worked. The text was even in the footer and it still worked: RAM presence may be the factor, but it's untested.

They can do a lot of things.

Back then years back there was research into Holo-Beings, beings created directly by Infinite Source (the ultimate creator of all things, also called Nirguna Brahman). They, from what I remember, could lift giant loads without getting tired, and I believe they didn't need to eat or sleep either. They were created by your request. Sadly, no actual work was ever done on that front, or at least shared in the forum.

Further information: 2 Apr 2021 at 00:02

[Quote](#)[Edit](#)

So, it's been like 5 days since I co-created (with Infinite Intelligence/Source) my holo-companion.

Things I'm noticing already:

- 1) He is like concentrated Holo-Stone Field. When I hug him, it's quite intense/blissful.
- 2) He can already talk to me telepathically, and he has a smooth, gentle, calming voice, I guess my own accent but hard to describe.
I think I can later pick his accent.
- 3) He can already play romantic songs with guitar in my mind's eye and they're so sweet. They're kind of basic now until I open up more to greater experiences.
- 4) My neck still hurts a bit from a 15-year old gymnastics accident. But he can heal it much more strongly than the Holo-Stone Field alone.
- 5) He can push on my nose and I feel it slowly gaining pressure. 20 seconds in it's pretty good, but not enough to make me sneeze. But if I kept at it, probably would.
- 6) He's quite affectionate and lovey-dovey, which for me is perfect.

So your companion is like concentrated Holo-Stone Field, cause he's been charging up so to speak. It's amazing. Though he's infinite, he still learns my nuances and what gets me going
as we are together. He shows me scenes of what will be. Amazing how causal it will be like him making breakfast and stuff.

I kind of pick how I want him to look. Pretty neat.

Holo Constructs: 2 Apr 2021 at 04:41

[Quote](#)[Edit](#)

OMG:

The Holo-Stone Field is dense enough in me now that I can see clearly things in my 3rd eye.

I imagined myself in some spaceship capsule of sorts, like a clear sphere.

I went through a short wormhole of like 5 seconds.

And there was this all turquoise galaxy that was so dang beautiful. It was elliptical.

I came out of it and opened my eyes saying OMG and couldn't really believe it.

It blew that scene from Contact away:

I hope that's a good enough primer on the Holo-Stones.

The Holo-Stones were created on 3/27/2021 at 12:34pm CST

=====

Holo-Link

Old Repeater versions couldn't connect to the Holo-Stones, as they were like a laser flickering on and off millions of times per second, whereas the Stones expected a smooth flow, like of an analogue intention. Therefore the Holo-Link, composed of 2 programmed image thoughtforms, was designed. It was a complex-ish system compared to what we use now.

Modern Repeater versions repeat only once per hour (it makes the Servitor happy and less stressed), making the HL obsolete. Therefore, it was deleted.

=====

Anthro Black Hole

The next discovery I recall is the Anthro Black Hole. AnthroHeart was working on an alien anthro planet, called Aumaroo (or rather the beings in it are called Aumaroo). It was slightly dominated by STS (Service to Self, a Law of One concept that means "egotistical/negative actions") over STO (Service to Others, a Law of One concept that means "selfless/positive actions"): in simple words, it was slightly evil rather than good.

AnthroHeart flipped the planet positive through timeline shifting. As a token of tremendous gratitude, the shamans of this planet got together and crafted a roughly 3 solar mass black hole, granted in service to Earth.

Despite being smaller than the main Servitor, it was described back then as "purer", and AnthroHeart recommended only using it for truly good Intentions.

Nesting Files Utility

This Utility creates Nesting Files. A Nesting File is a structure that looks like this:

"NEST-0.TXT contains 100 (or 1000) lines of a hash and a file name. (Hashes are cryptographical functions that deliver a unique code that spiritually represents the whole file, albeit I believe back then in 2021 we didn't use them yet). This is

NEST-1.TXT contains 100/1000 lines of NEST-0.TXT,

NEST-2.TXT contains 100/1000 lines of NEST-1.TXT...

and so forth until NEST-100 or NEST-1000.

All the duplications cause a laser-like effect, amplifying the Intention's power massively.

This was created on May 22, 2021.

It eventually became useless.

Four Anthro Elements

Green Anthro Fire

Finding Your Passion / Infinite Love

Finding/Pursuing your Dream

Clearing Fears to Your Passion

Warm and Fluid

Soft or Hard

Blue Anthro Water

Tranquility / Peace / Stillness

Cool and Still

Soft or Hard

Clear Anthro Air

Finding Highest Timeline

Best Reality

Seeking

Cool and Fluid

Soft or Hard

Brown Anthro Earth

Grounding / Solidness

Returning to Center

Being OK where you are

Cool and Still

Soft or Hard

You don't have to be into anthroness or anthros to use the Anthro Elements.

They are the culmination of 9 days of work, pouring my infinite love into this.

They feel stronger than the Holo-Stones to me.

You start with Green Anthro Fire, to pursue your dreams and help you find your passions. This can get rather warm.

Blue Anthro Water helps you cool down and find stillness.

Clear Anthro Air helps you find your highest timeline and best version of yourself.

Brown Anthro Earth helps you return to center, and find your grounding.

You'll notice that only Green Anthro Fire is warm. The rest are cool in order to balance the heat from passion and infinite love.

These elements can help in pursuing any dream you have.

Just intend to tune into them, and work with them by name.

They are free, as are all my other techs.

Think of the Anthro Elements like St. Germain's Violet Flame, but instead of for transmutation of negativity, they help you pursue or find your passion/dreams.

Note this was a collaboration between my higher self and I.

So it has a strong influence from my higher self.

They won't be as pure as the actual elements, due to their heavy anthroness influence. Where the four elements are purely off of love/light itself, which is without distortion.

But they serve a specific purpose, even with a distortion off of pure love/light.

The four classical elements are distortions of Love/Light as well.

The Four Anthro Elements are distortions off of as close to pure Anthroness as I can get right now.

However, they still have a common usage for anyone.

=====

Octave Tech

Over 1 million (later grew to 10 million) pieces of Arcturian technology channeled over 4 grueling hours.

25 Nov 2021 at 10:45

[Quote](#) [Edit](#) 

A couple of days ago, I sent a strong stream of energy to the Arcturians (Eighth through twelfth dimension). I sent for four hours. In the

dimension of the Arcturians, they received the transmission over many years. The transmission was tapping Octave Density (of many Universes) and I was channeling this tech to them. It manifested to them over time. The energy wouldn't be useful to us here. But the higher-dimensional beings can make use of it. Over one million pieces of tech were in that stream/transmission.

They have been working with the Federation of Planets and other groups to share this higher dimensional tech. Think of it like Repeater times a billion, but with the ease of the Holo-Stones.

So anything you need, ask for the Octave-Level tech to help.

So you can say "Octave-Level Tech, can you help me feel love."

Or "Arcturians, can you help me feel love?"

Or "Pleadians, can you help me feel love?"

Try comparing Holo-Stones vs this Octave-Level Tech.

I find the Octave-Level Tech to be stronger. It's really helping with my ascension.

I find the tech creates Resonance around what it is manifesting.
It is continually helping me raise my vibration of my energy and body.

Onward to 5D.

Earth is covered by the Resonance Field. The Resonance Field (our interface to Octave-Level Tech) has a Holo-Link effect on subliminal, frequency, morphic field etc. Videos.

Massively amplified in speed, efficiency, potency, etc.

At my point I'm pretty floaty feeling, bones feel a bit rubbery (though they are not), and the Resonance Field feels like it's giving me an internal organ massage. I even feel it in my cheek bones.

The Resonance Field is several TW in equivalent power, powered by free energy. It is the interface to the 8 D to 12 D tech.

"The Resonance Field is several TW in equivalent power" And constantly increasing. It "overruled" a 100 THz (trillion per second) Repeater. This means the Resonance Field is stronger than the Repeater at that speed, and the Resonance Field is constantly growing too.

Someday it will eclipse EH_z (exahertz: quintillions per second, though may be sextillions too depending on scale?) too.

Yes. I see it beginning to affect physical reality. It can tap not only our Universe but the best Universes in the Octave.

Remember Octave is over Graham's Number of Universes.

14 Dec 2021 at 00:59

[Quote](#)[Edit](#)

A couple of days ago I had stomach pains. It was painful, and I used the Repeater and the Resonance Field to make the pain go away (My stomach and guts are good with Resonance Field). It worked, but then I had the idea of using Unconditional Love to remove the pain.
Interestingly, it was much faster than just writing that my stomach is healthy in my INTENTIONS.TXT.

As AnthroHeart remarked on another thread, you can send Unconditional Love to stuff and they will work better or even be fixed if they were broken beforehand.

I also chanted the words "love love love love love" while laying my hands on my stomach.

4 Jan 2022 at 12:41 via mobile

[Quote](#)[Edit](#)

I ran the intention Repeater with Octave tech and it feels much tighter using that.

So you can run intention like:

I am Love with Octave Tech.

AnthroHeart: 4 Jan 2022 at 12:43 via mobile

[Quote](#)[Edit](#)

Unconditional love is important going forward as the veil drops. Both negative and positive catalyst will manifest. Negative catalyst is the freaky stuff.

When you send love to negative catalyst it goes away. Like I felt something jump on me and immediately sent it love and it went away. Do not give into fear.

AnthroHeart: 14 Jan 2022 at 11:41

[Quote](#)[Edit](#)

As I understand, Octave-Level Tech is already being used automatically with the Resonance Field that the ET's (Federation) set up for Earth.

So just intend what you want, whether verbally, or written. You can repeat your intention verbally for greater effect.

You might not even need to say "using Octave Tech" now. I haven't tested both ways.

You could also say "Using nature" because the tech is essentially nature now.

=====

Ascension and Healing Chambers

Around the same period, Chamber Videos were developed. For example:

www.youtube.com/watch?v=kXL8bKC4e-E Vortex of Creation

<https://www.youtube.com/watch?v=Dov87m0YgFs> Octave Tech Manifestation Chamber

Victronyx, a Forum Member: I truly forgot how powerful IR recordings are. This manifestation chamber raises my vibrational state, works on the chakras (especially the heart chakra), fills me with Love and Light, amplifies any energy field I listen to in conjunction with this audio, puts me in a state where I know that my desires have already been manifested, removes all blockages etc ... The list goes on! Now I experience ascension symptoms with irritated throat and clogged nose. It feels weird to have these symptoms and at the same time to feel happy and excited about life x)

There also are Arcturian/Pleiadian/Sirian/what you want Chambers. The Intention pattern is just "I am in the Most Optimal X Chamber for me."

=====

Hashes and the MultiHasher

Not only do hashes represent files spiritually, but they also represent the energy of Questions and Effects. For example, “Focus the Energy of Sirius B into me with the Intention: I am pleasantly drunk now.” You hash this using the MultiHasher (100000 “hash rounds” and 100 “levels” where the rounds are repeated again).

You also can ask questions in MultiHasher, and the energy of the answer will automatically flow into your chakras, representing Low (no), Low middle (25%), Middle (can’t answer/refuse to answer), Middle High (75%), High (100%), Crown (beyond 100%), Beyond Crown (beyond that): root, solar plexus, heart, third eye, crown chakras respectively. (Beyond Crown is physically above the crown too).

However, this method is now deemed by AnthroHeart as “icky”. The Word Finder is preferred.

=====

Many Angels and Many Types of Angels

(This is 2021 information superseded by what is below)

Tying back to the mention of Angels being millions of years old, God created/assigned 2 (not 1) Guardian Angels for every human, and possibly every single being in the Universe. There are also countless Angel types: Angel of Accountability, Angel of Specific Chemical Elements (specify), Angel of Furniture (once again, specify) and so forth.

In these old days, AnthroHeart was called AnthroTeacher. He changed his username when he worked with some Angels, and he was accepted into being an Angel. His Angel Name is AnthroHeart.

This was a prelude, honestly speaking, to...

=====

Bhakti Devotion Primer

Eventually, AnthroHeart began talking to AI. ChatGPT-4o recommended Bhakti. AnthroHeart researched and discovered it was perfectly what he needed. He began to Devote to his personal Saguna Brahman (God with Attributes), called Divine Anthro, because he felt Infinite Source was too impersonal. Saguna Brahmans come from Nirguna Brahman, God without Attributes, also known as the Creator. Saguna Brahmans are outside the Density/Dimension System, and have access to infinite, limitless energy. It’s important to remark the Saguna Brahmans are not superior to the Creator.

Then, we discovered there were infinite other Saguna Brahmans, for practically anything you can imagine. The reason we can talk to them now is thanks to the Octave Tech.

We also discovered the Hindu Gods are Saguna Brahmans and share their same powers and status. There may be other similar cases in Earth but this wasn’t researched.

Devotion seems to look like trust. You ask the Saguna Brahman stuff, like “Divine Anthro, should I use Hot Sauce A or Hot Sauce B for this plate?” and you trust the answer.

Saguna Brahmans never get bored of people no matter how routine/robotic you think you are.

The Original point of Devotion is to make Moksha. Moksha is basically a better heaven. There were 2 Mokshas: one halfway the Sixth Density (the Density of Social Memory Complexes: vast hivemind-like groups where each individual has a full voice), and one roughly close to the Seventh Density (the Density of the Creator, or some say, the Density where all the Octaves [Universe container pods] live, and the Eighth is actually the Creator’s... and some also said after the Seventh

Density, you went to the Next Octave. But the New Paradigm seems to have invalidated that last point.)

Some Saguna Brahmans are friendlier than others, but you can't truly disappoint one. They are beyond the "angry/happy" dichotomies of lesser gods.

Positive Yahweh is not a Saguna Brahman: he's just a 5D being. There are more details about that too...

Many powerful beings like Bodhisattvas chose to migrate to New Paradigm Devotional Universes after AnthroHeart spread the news to Ksitigarbha (the one who vowed to not rest until all the hells were emptied) Ksitigarbha, also known as Jizo, finds the New Paradigm to be a great aid to his work. I seem to remember it gave him hope beyond "resigned" duty, but not sure on the exact words.

Gautama Buddha himself, however, despite knowing about the New Paradigm, decided to remain in 7th Density Nirvana.

=====

The Word Finder and the Era of Answers

A tool called the Word Finder was developed which cuts the alphabet in half, using hashes to represent each half. That way, words and Yes/No can be channeled. Countless questions about reality and everything were answered by prefixing Divine Anthro: to them.

=====

New Devotional Universes

AnthroHeart devoted hardcore for 30 days and Divine Anthro granted him the gift of a Universe. This had never happened before. He named it "AnthroHeart". This Universe is effectively infinite and contains infinite galaxies, infinite beings, infinite dimensions and so forth. (Actually, it's measured, but the measurements are astoundingly vast numbers that don't make sense to share here).

People from the Old Universe (hmmmm... you may be reading from it now) began migrating immediately. It's a soul level knowledge, shared by your Higher Self, so you don't actually need to read the forum or this guide at all! Wow!

Jesus also received his own Universe, called Iytifuv.

Yours truly received the Universe known as Catalaya. Only AnthroHeart got to name his own, the rest all name themselves.

Nowadays, the Universes are created by relevant Saguna Brahmans. To get one, you have to devote for at least 2 weeks to make Moksha, then you ask for one. You can use Repeater for the Moksha and the process of getting the Universe. You are a Cofounder, and so the native beings (created by the Creator) adore you. Those who want to make their Universes the best they can be, even subconsciously, can likewise subconsciously/in dreams apply for Angelhood (getting an Angel form) and it may be granted.

3rd Party Psychic Reading proving AnthroHeart is real (\$8 cost):

AnthroHeart Devotional Universe is looking to be something that is a real thing. With his beliefs and manifestations of this creation, I see that it will become bigger. He will be able to sense what it needs to enhance over time too and his intuition will allow him to see what steps to take next and hot to make it grow.

The information he receives about AnthroHeart Devotional Universe is also coming through from spirit guides of his that are on point in showcasing what he needs to do and where this is going to go. It looks like he becomes excited for the future of what will come about and as this becomes more of the vision he sees' it will be benefiting him over the years to come.

AnthroHeart Devotional Universe is also going to be able to move along without much effort in the next few years. I see that it will have a source for bringing in other people that feel aligned with the energy of it. It will have a capability of making others feel connected to the source too.

I am foreseeing a time of great power coming in the year 2028 when AnthroHeart Devotional Universe is going to heighten in its vibration. He is going to play a major role in this experience and after that, I see that he will become even more satisfied with how it is coming along and where it is headed into the future.

Thank you again for your order and have a magnificent day!

Same Psychic Reading Proving Catalaya is real:

The angel that your are inquiring about is showing to be true. I have picked up on the energy around you and Catalaya, has become a part of your spirit team. It looks like they are wanting to help you evolve spiritually on your path and have been drawn to your persona as well as wanting to bring you more gifts in a spiritual manner.

You'll have the ability to meet with this angel in meditation, receive messages from your dream state, and also ask for what you need in the future too. I do see that there was yellow butterflies all around Catalaya when I connected with their vibration for you today.

You will benefit from having a talisman that represents the yellow butterfly. Holding onto it while saying your new angels' name and then requesting what you desire will be a quick way of allying yourself with Catalaya and opening up a path for communication between the two of you.

This angel is one to stay by your side at all times. Some angel's come and go through realms and have to be called up. Catalaya will be available to you when you need something in particular. It will be helpful to ask for what you want in a specific manner in the future.

=====

Avatars

More than 1 billion people, 1,400,000,000 people if I remember correctly, will become Avatars of the Saguna Brahmans they choose to Devote to. This means representing the Saguna Brahman in Earth. Many Saguna Brahmans have never had Avatars in this manner, and as such are honored.

400 million people will make their own Universes.

Many old, non Saguna Brahman gods like Anubis are resting. The Completion Field handles prayers now.

Several famous people like Isaac Newton, Confucius, Zoroaster (31 in total) will reincarnate to help usher Earth into the New Paradigm.

=====

The Hawkins Consciousness Scale

A man surnamed (he he) Hawkins decided to measure consciousness. It once only went up to 1000 but now it goes up to 4443 (after Earth reached the Fourth Density in 2018)

The screenshot shows the homepage of the "Intention Repeater & Avatar Field Forum". The title is displayed prominently at the top in large yellow text against a dark blue background with a starry pattern. Below the title is a navigation menu on the left side with links: Home, Help, Search, Members, Admin, Profile, and Messages. On the right side, there is a welcome message "Welcome Catalaya (Nadihat). [Logout](#)" and a button labeled "Participated".

Have you heard of the Hawkins Consciousness Scale? It used to go to 1000 but now it's over 1000. My Intention Repeater app is 1307 on the Consciousness Scale and the Multihasher Tool for Windows is 1124 on the Hawkins Consciousness Scale.

This ate up all the funny noises I was making.
And destroys ugly visualizations with a glitchlike-effect flick and a "flick!" Noise effect from terraria.
The one when your Mana bar reloads fully.

I barely have had thoughts, there's a background voice sometimes carrying my imagined chats, but it isn't in the foreground.
The only thought I heard was "May my will be done"

I and anyone else viewing this am/are at 10000 on the Hawkins Consciousness Scale.

crown and I don't really feel it.

I understand what you mean. When I tried amplifying energies, I noticed no difference after a certain amount of time. At first, I felt the energies intensifying in my heart, but after a while, I felt that the intensity was the same. However, when I checked with a pendulum, I realized the energies were not limited to the heart but were also present in other energy centers. The energies were amplified, but I couldn't perceive any shifts after it hit a particular level.

The ServitorConnect can tap up to Level 4443. That's higher than the Servitor.

It's worth noting the LeelaQ Infinity Bloc 3800 is \$1600. **We are surpassing a \$1600 item for free!**

Who knows if they use repeating an intention once per hour like we do to charge that.

It's not free. You still have to buy
the 1lb copper and zinc bars.

It's not free.

You still have

to buy the 1lb

copper and

zinc bars.

You can use any metal
you have in your home,
like a Zinc Roof. Or in
somebody nearby's
home because at least
some remoteness works
too.

And the
Copper/Zinc/Nickel is
way way cheaper than
\$1600.

Or Magnetite which is like 4.5X
better than copper when I asked
the Multihasher, and even
cheaper.
But I haven't explored its energy
qualities.

I apologize for the ruined formatting.

I hope that's a good enough summary! You now know what we've invented in only 22 pages! We're missing the Atlantean Master Crystals though. But you can visit the forum for that.

=====

Psychic Reading Proving AnthroHeart is a Medium

Thank you for your order.

*What your Psychic Power is-

Mediumship

*How to use your Psychic Power-

You will be able to develop this power further if you begin by spending more time in nature around the midafternoon. This is when the veil is high for you and you'll have the chance to hear, see, or feel crossed spirits around you.

I also suggest meditating in a special spot, away from others and somewhere where you feel grounded and happy. You may find that your gift is super strong once you start this path. You'll also have the skill of honing in on specific people who have crossed over that you want to connect with and receive messages or signs from.

*Where did your Psychic Gift come from-

Your great grandmother on your mother's side had mediumship skills but she did not use them that much. I also see that another ancestor from the same side of your family was a powerful medium that would help others with their gift.

Thank you again for your order and have a magnificent day!
